

## Long life, selection and constant colour

Surelite's own brand of Metal halide lamps are among the most reliable on the market today. They feature nickel plated bases, brass contacts and anti vibration supports. Surelite also utilizes an innovative coating process & specially controlled metal additives which result in dramatically increased efficacy and elimination of colour shift. Lamps can last 2 - 3 times longer and will never dim compared to competitive brands. Surelite's huge selection includes: energy savers, higher wattage versions, reduced envelope or more compact lamps, high CRI lamps or lamps that replace dull yellow sodiums. Our MP series have a solid quartz shroud which prevents arc tube pieces from breaking the outer jacket glass for safety.

## Benefits

- Long Life - up to 40 000 hours
- White light versions that replace sodiums
- Innovative technology for high performance
- Efficient: 80 -115 lumens per watt
- Smaller sized versions available for storage/handling
- Energy savers or higher watt versions for more light
- Stays white with minimal loss of light over time

## Applications

- Warehouses/Manufacturing plants
- Distribution centres
- Box stores
- Stadium lighting
- Outdoor Lighting
- Horticulture
- Arenas/Rinks/Indoor pools
