

Traditional colour in a premium lamp

Available in T5, T8 and T12 fluorescent lamps, Vision 41™ is recognized as the most popular and generally used light source. With cool white colour, good colour rendering and long life, it's the flagship of the vision series. By using an advanced mercury dispensing system, it contains 55% less mercury than most fluorescent lamps. The Vision 41™ is an energy efficient lamp. Due to its low mercury content, it's easily disposable and environmentally friendly. Our special cathode guard eliminates lumen depreciation or loss of light. These high CRI lamps are bright and will stay bright with no end or wall blackening. Vision 41™ lamps run maintenance free for over 40 000 hours or up to 5 years, Guaranteed.
